

Sushank Sajwan

AI Engineer - LLM Platforms, Agentic Systems & RAG

+91 9897118757 | sushanksajwan209@gmail.com | Noida, India | [linkedin.com/in/sushanksajwan](https://www.linkedin.com/in/sushanksajwan)

PROFESSIONAL SUMMARY

AI Engineer with **8.5+ years** building production-scale **LLM platforms**, **multi-agent orchestration systems**, and **RAG pipelines**. Delivered async, agentic backend systems on AWS achieving up to **6x latency reduction** and **50–68% throughput gains** at scale. Tech Lead experienced with **LangGraph**, **CrewAI**, **AWS Bedrock**, and **Vertex AI**, owning system architecture end-to-end - from ingestion and retrieval through LLM serving and production hardening - while mentoring engineering teams.

TECHNICAL SKILLS

GenAI & LLM: AWS Bedrock, Vertex AI, LangGraph, LangChain, CrewAI, RAG pipelines, hybrid semantic search (BM25 + KNN), vector databases, MCP servers, HITL workflows, feedback reranking, LLM evaluation & guardrails

Backend & Distributed Systems: Python, FastAPI, AsyncIO, Celery, Flask, event-driven architecture, distributed task orchestration

Data & Storage: OpenSearch (Vector DB), PostgreSQL, DynamoDB, Redis

Cloud & DevOps: AWS (ECS, SQS, SNS, SES, S3), Docker, CI/CD pipelines, observability

Leadership: Tech-lead delivery ownership, mentoring engineers, design & architecture reviews

EXPERIENCE

Xebia IT Architects India Pvt Ltd - Gurugram, India

Mar 2026 - Present

Lead Consultant

Servicing Agent System - Automated Query Resolution Platform

- **Asynchronous agent orchestration:** designed a background resolution pipeline using **LangGraph**, **FastAPI**, **PostgreSQL**, and **Celery** on **AWS ECS**, processing ~6,000 daily queries with an 18-second turnaround via targeted Redis caching.
- **Secure ingestion & routing:** built the workflow entry layer combining Microsoft Presidio **PII sanitization**, intent/sentiment classification, and LLM-based security gating to route legitimate queries and block malicious inputs.
- **Closed-loop generation & validation:** designed an iterative retrieval and synthesis engine with a quality router enforcing compliance, faithfulness, and contradiction checks prior to response assembly.

Magic Softwares Private Limited - Noida, India

Jan 2024 - Mar 2026

Lead Software Engineer

AXIS - Agent Exchange & Interoperability Service

- Designed an enterprise **multi-agent orchestration platform** with **CrewAI & LangGraph**, supporting dynamic workflow branching via **Python/FastAPI**; built a provider-agnostic routing layer for seamless model switching across **OpenAI**, **Claude**, and **Gemini** via LiteLLM.
- Designed **distributed job execution** on **AWS ECS** using Celery with adaptive concurrency controls, improving pipeline throughput by **50–68%**; integrated 25+ enterprise tools and APIs for research, verification, and analytics.
- Delivered **HITL approval and revision workflows** with execution audit history and rollback support, plus real-time job tracking processing **1,000+ orchestration workflows daily**.
- Designed versioned orchestration APIs (FastAPI/Python) governing agent lifecycles, task graphs, and execution states.

TextGen - Multi-Model Text Generation Platform

- Built a **unified AI generation service** integrating **OpenAI**, **Claude (Bedrock)**, and **Gemini (Vertex AI)** via FastAPI, with **LangChain**-based provider-agnostic switching for dynamic runtime model selection.
- Implemented sync/async pipelines (**Celery**, **AWS SQS**, **DynamoDB**) with **streaming response APIs**; scaled to **~5,000 requests/day**, cutting turnaround from minutes to **~30-40 seconds**.
- Delivered enterprise-grade **RAG pipelines** grounded on organization-specific datasets, plus LLM schema validation, guardrails, and usage/cost monitoring instrumentation for production stability.
- Designed backward-compatible API versioning (v1-v3) using FastAPI/Pydantic.

Alignment Service - AI Educational Standards Alignment Platform

- Built **AI prompt-chaining pipelines** to extract, normalize, and classify learning objectives across educational frameworks; implemented **hybrid semantic search (BM25 + vector KNN)** on OpenSearch indexing **50,000+ objectives (~80GB corpus)**.
- Re-architected retrieval and scoring flows, reducing search latency from **~30 seconds to ~2 seconds**; implemented a closed-loop **feedback reranking system** using positive/negative query signals.
- Delivered search and analytics REST APIs (FastAPI/Pydantic) with LLM schema validation and centralized observability for production reliability.

EARLIER EXPERIENCE

Edegem Technologies Pvt. Ltd. - Ahmedabad, India

Mar 2022 - Dec 2023

Senior Software Development Engineer

FileGuard - Email Threat Detection Platform

- Architected **FileGuard**, an **AWS-native security scanning platform** using **Python/Flask, ECS, SQS, SNS, SES, and DynamoDB**, reducing security incident response time by **~70%**.
- Designed **distributed scanning pipelines** for attachment sanitization, URL inspection, and malware classification; built monitoring and retry workflows for high-volume email ingestion.
- Implemented **containerized CI/CD pipelines** enabling safer microservice releases and improved deployment stability; performed backend architecture reviews and mentored junior engineers.

Knowlarity Communications Pvt. Ltd. - Gurgaon, India

May 2021 - Feb 2022

Software Developer

Cloud Telephony Backend Platform

- Engineered high-throughput **Python/Flask** backend services for real-time call routing and billing integrations.
- Spearheaded production incident **root-cause analyses** and optimized API concurrency, increasing overall system uptime by **~40%**.

Advanced Structures India Pvt. Ltd. - Bengaluru, India Aug 2019 - May 2021

Senior Software Development Engineer

xcPEP — Automotive Benchmarking & Analytics Platform

- Led backend development (**Python/Django**) for an enterprise automotive analytics platform, designing large-scale **ingestion pipelines** for complex engineering datasets.
- Architected a **smart imaging pipeline** and automated benchmarking workflows, reducing manual validation effort by **~90%** and cutting turnaround time by **50%**.

Wipro HR Services India Pvt. Ltd. - India Jan 2018 - Jul 2019

Associate Analyst (Final Semester Project to FTE)

Enterprise QA Automation System

- Developed automated functional test frameworks (**Python/Django**) and drove defect remediation, reducing QA cycles by **25%** and improving release stability by **40%**.

EDUCATION

Master of Computer Applications (MCA) - Uttarakhand Technical University, Dehradun, India (2016–2018)

Bachelor of Computer Applications (BCA) - Hemwati Nandan Bahuguna Garhwal University, Shrinagar, India (2010–2013)
